

Make it smart

With Linus[®] Smart Lock

Yale is trusted by millions of people every day to keep what's important to them safe.

Our innovations have protected their homes, families and belongings for over 180 years. We have expanded from being a leader in mechanical lock engineering to innovating connected smart locks and homes. Because we always make every effort to push the boundaries in a changing world.

We were there for your grandparents (and probably theirs) and we'll be there for your children.

Today, and every day to come.

Full control from the palm of your hand

Turn your smartphone or Apple Watch into your key. The intuitive Yale Access app for your Android or iOS device lets you manage the access of your home remotely.* You can share access with the people you trust, view activity, and receive notifications.

* Yale Connect Wi-Fi Bridge is required for functionalities such as locking/unlocking your door remotely, instant alerts to your phone and for integrations like voice assistants.

Installing is a breeze

The Linus® Smart Lock is easy to install over the existing cylinder on the inside of your front door, so you can keep and use your original keys. Your front door will look just the same as before from the outside – without revealing any smart features.

Auto-lock and unlock as you come and go

For peace of mind, the auto-lock feature can automatically lock your door when you leave for the day, either immediately after closing or after a set amount of time via the Yale Access app. When you return home and walk up to your door, Auto-unlock will then unlock it again thanks to geo-fencing, so you don't need to fumble around with keys.

Grant entry from wherever you are with the Yale Access app

Remote access means you can let in family, friends and trusted visitors like the cleaner or the delivery driver – from anywhere – when Linus® is paired with Yale Connect Wi-Fi Bridge. If someone forgets to lock when they leave, you can take care of it with the tap of a finger.

Safe and secure

Your security is our business. Yale Access account is protected by 2-factor authentication meaning that on top of your password, you will be required to verify your identity with either an email or phone number.

Our Linus® Smart Lock uses Bluetooth Low Energy (BLE) technology encryption. On top of the security offered by Bluetooth, we use AES 128 and TLS encryption, commonly referred to as bank level security. If you lose your phone, you can disable your Yale Access app and all virtual keys at any time.

Linus[®] Smart Lock

Specifications

App control

Manage access to your home from anywhere with the Yale Access app

How it works:

Download our free Yale Access app on iOS and Android. Our Linus[®] Smart Lock works with our Yale Access range – check our website for more info.

Yale Connect Wi-Fi Bridge

For functionalities such as locking/unlocking your door remotely, instant alerts to your phone and for integrations like voice assistants.

Open the door when you're not home

From your smartphone, instantly unlock the door remotely for visitors and lock it behind them, no matter where you are.

Monitor access from anywhere

Always know who is coming and when, and if your door is locked or unlocked. Check your lock's status any time, from anywhere.

Enable integrations such as voice assistant

Use your Voice Assistant devices to unlock your door (using a PIN *), lock it securely and check the status of your Smart Lock at any time.

Yale Smart Keypad

Perfect for kids, guests, or your house cleaner to access your home without a traditional key or smartphone.

Easy to use for everyone

Perfect for guests, your dog walker, house cleaner, handyman, or tradesmen to access your home.

Know who comes and when

Keep track of who entered your home with unique entry codes for each guest.

Enjoy peace of mind

Rest assured that you can still unlock your door, even if you run out of battery on your phone or if you lose your smartphone or keys.

The Yale Access app functionalities

App control

Lock and unlock your door from your app, anywhere in the world.

DoorSense™ technology

The lock will check the status of the door and tells you if your door is securely closed and locked.

Activity monitoring

See who comes and when with the Activity Feed. Check who unlocked the door and if or when it was actually opened. Set-up alerts to notify when specific people arrive home.

Guest access

Grant unlimited virtual keys valid for a few weeks, a few hours, or a few minutes. Never worry about lost or stolen keys again.

Smart together

Connect your Linus® Smart Lock with leading smart home systems, voice assistants and holiday rental platforms for effortless lock control and access management.

Everyday life made easier

Together with our trusted partners, Linus® have the potential to open up a range of unique possibilities including in-home delivery, short term rental, and services like cleaning or babysitting – all of which will simplify our already time pressured lives.
